

Rotary Slasher / Lawn Mower

Code : A-RS / LM

Rotary Slashers is an agricultural machine, which is used for cutting unwanted grass. These rotary slashers are joined through jigs, fixtures & dies, thus ensure joining accuracy as well as interchangeability. It has heavy duty gear boxes and rugged frame which can withstand rough and tough wild grass, anchored straw and bushes. It is designed for fast application to any type of 50-80 HP tractor with three point linkage.

Advantage

AGROVISION GRASS CUTTER horizontal slashing is the most versatile method of grass cutting. Rotary slasher is powerful enough to cope with tall weeds and small bushes, yet giving a satisfactory fine cut on turf areas mounted with optional front and rear Tyre, scalping is minimal. Tractor-mounted rotary slasher provides a very cost-effective grass cutting solution. AGROVISION rotary slasher is one of the best machines in itself for cutting unwanted wild grass.

Features

- » Designed for fast application to any type of 35-50 HP tractors with three point linkage.
- » Safety chain shield standard.
- » Tractor driven suitable for P.T.O. 540 rpm.
- » Rotary slasher and grass slasher having reversible steel blades for cutting wild grass, shrubs, weeds, sugar cane, stacks, etc.
- » Cutting width: approx. 6 feet & 8 feet.
- » Height adjustment: 25 mm to 200 mm.

Technical Specification

MODEL	A-RS6'	A-RS8'
