

Sub Soilers

Code: A-SS

The AGROVISION sub soiler is a tillage tool which will improve growth in all crops where soil compaction is a problem. The design provides deep tillage, loosening soil deeper than a tiller or plow is capable of reaching. It is used to break the lower impermeable hardpan, which cannot be broken by normal cultivation operations. Successful subsoiling loosens and shatters compact soil layers by creating many cracks and fissures thus allowing roots to develop more freely and water to move down more rapidly. This rather inexpensive implement provides a simple and economical way to obtain good crop yields and profits.

Advantage

- » AGROVISION SUB SOILER/CHISEL PLOUGH are deep tillage implements specially designed for breaking up hard pan layers and loosening the subsoil allowing
- » The heavy duty chisel pointed share shatters the soil well below the surface, thus increasing the water holding capacity.
- » It preserves moisture during high rainfall which is very important for the crop to withstand low rainfall or drought periods.
- » It is an inexpensive implement it provides a simple and economical way to obtain boosting crop yields and profits.

Features

- » It can plough up to 550 mm depth.
- » It fights draught by increasing the ground storage capacity.
- » It increases soil turnover by reaching deeper organic matter layers.
- » Adjustable ploughing width.

Technical Specification

MODEL	A-SS1R	A-SS2R	A-SS1R
LENGTH	500 mm	550 mm	850 mm
WIDTH	660 mm	1200 mm	1500 mm
HEIGHT	1050-1375 mm	1050-1350 mm	1050-1350 mm
TYNE	150x25 mm	150x25 mm	150x25 mm
APPROX. WEIGHT	70 Kg.	170 Kg.	250 Kg.
POWER REQUIRED (HP)	40-50 HP	50-60 HP	70 Above HP
